CLOYD A. PORTER

State Representative — 66th District

August 15, 1990

AUG 29 1990

The Honorable William K. Reilly, Administrator
The Environmental Protection Agency
401 M Street S.W.
Washington, D.C. 20460

Dear Mr. Reilly:

It is my understanding that the Environmental Protection Agency (EPA) is considering permitting the use in this country of a gasoline performance additive, Hi-TEC 3000, produced by the Ethyl Corporation Chemical Group. The additive appears to help reduce nitrogen oxide coming from cars, thereby reducing smog.

Being a member of the Assembly Natural Resources Committee has made me well-aware of the need to pursue the reduction of smog, as well as other worthy environmental goals, in a reasonable manner.

Given that air pollution is a major concern to many people in my area, I therefore believe that all reasonable options for reducing air pollution should be examined as quickly as possible. It is therefore my hope that the possible use of Hi-TEC 3000 in the United States will be given prompt consideration by the EPA.

Sincerely,

CLOYD A. PORTER
State Representative
66th Assembly District
